DETAILED ACTION

The amendment filed September 16, 2005 have been received and entered into the application.

Action Summary

The rejection of claims 30-32 under 35 U.S.C. 112, second paragraph is hereby expressly withdrawn in view of Applicant's amendment.

The rejection of claims 30-32 under 35 U.S.C. 103 (a) as being unpatentable over Steiner (Thrombosis and Haemostasis, 1983) is hereby expressly withdrawn in view of Applicant's amendment.

Applicant's arguments with respect to claims 30-32 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1617

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishikawa et al. (U.S. Patent No. 5,128,334).

Nishikawa et al. teach a composition comprising **ascorbic acid** (vitamin C) and aspirin is an effective analgesic and anti-inflammatory medicine. (abstract). Nishikawa et al. teach female Sprague-Dawley rats (20 weeks of age, primarily weighing 400 to 420g) were given a medicine containing 500mg/kg/day aspirin and 50mg/kg/day ascorbic acid. It is noted that therefore, the medicine given to the rats contains the "effective amounts" claimed by the Applicant. ($0.4\text{kg} \times 500\text{mg} = 200\text{mg}$ aspirin; $0.4\text{kg} \times 50\text{mg} = 20\text{mg}$ vitamin C).

Further, Applicant's recitation in claim 30 of an intended use for reducing atherosclerotic plaque formation at site of endothelial damage in humans through the reduction of cholesterol incorporation into the endothelium does not represent a patentable limitation since such fails to impart any physical limitation to the same composition taught by the prior art.

Art Unit: 1617

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 102(e).

None of the claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
